Questions to ask my doctor about my emotional health

Please print this page and discuss the following with your doctor during your next office visit.

Questions	Doctor response
Should I be screened for depression, anxiety or both? Are there any signs or symptoms I should watch for? Could I have other physical causes for my change in mood? Is my depression or anxiety affecting the management of the diabetes? If so, is there something I can do?	
What are the treatment options for depression, anxiety or both? Do I need to see a counselor or other professional who can best help me with this?	
 If starting a new medication: Is it safe to take with my other medications? Are there any medications I should stop when I start this one? Are there any side effects I should be aware of? What should I do if I have any of these side effects? Is it the most cost-effective choice? For example, does it have the least expensive copay? Is a generic form available? What strength are you recommending? How many times a day do I need to take the medicine? What should I do if I miss a dose? Do I need to avoid alcohol or any particular foods while taking this medicine?
