

Questions to ask my doctor *about increasing or changing my diabetes medication*

Please print this page and discuss the following questions with your doctor.

Questions	Doctor response
What are the goals for my blood sugar and A1c levels?	
Because I am not at that goal, is a medication change or dose change in order at this time?	
Is there other labwork recommended I get done while on these medications? If so, how often?	
What other things can I do to better control my blood sugars?	
What complications may I experience if my blood sugars are not well managed?
